🐙 github.com/impruthvi

Summary

Laravel developer who shipped a healthcare SaaS platform to **3,000+ patients**, reduced API response times from **800ms to 480ms**, and had a pull request merged by **Taylor Otwell** into the Laravel React Starter Kit. Four years of production experience building **scalable backends** with **PHP, Laravel**, and modern frontends (**React, Vue.js**) that serve real users at scale — with **99.9% uptime**, **95% test coverage**, and **\$500K+** in processed transactions.

Open-Source Contributions

- **@impruthvi/nodemail** — *Published MIT-licensed npm Package* · **200+ weekly downloads**: Designed and shipped a **Laravel-inspired email library for Node.js** with full **TypeScript support**, multi-provider failover (SendGrid, AWS SES, Mailgun, Resend, Postmark), **BullMQ queue integration**, template engines (Handlebars, EJS, Pug), and a fluent API — production-ready with CLI, rate limiting, and fake mail testing utilities.
 - **Docs**: nodemail.impruthvi.me
- **Laravel React Starter Kit** — PR merged by **Taylor Otwell**: Fixed **TypeScript form handling bug** in `useForm` hook — improved API consistency and prevented missing field submissions.
 - **PR Link**: [GitHub PR #46](#)
- **Mobile-Responsive Drawer Component** — Positive review from **@tnylea**: Designed and implemented a **responsive drawer component** improving mobile navigation UX across Laravel starter kit.
 - **PR Link**: [GitHub PR #57](#)

Technical Skills

- **Languages**: PHP, JavaScript, TypeScript, SQL
- **Backend**: Laravel, REST APIs, Queues (Redis, Beanstalkd), Sanctum, Horizon, Eloquent ORM, Webhooks, Blade, Service Container, Repository Pattern, Events & Listeners
- **Frontend**: React.js, Inertia.js, Vue.js, Livewire, Tailwind CSS, Next.js
- **Databases**: MySQL, PostgreSQL, Redis, MongoDB, Elasticsearch
- **DevOps**: AWS (EC2, S3, RDS, Lambda), Docker, Nginx, Supervisor, GitHub Actions, CI/CD
- **Testing**: PHPUnit, Pest, Cypress, Jest, TDD — 95% coverage achieved in production
- **Integrations**: Stripe, Razorpay, CRM APIs, Messaging APIs, Socket.io, Open Banking

Experience

Vivansh Infotech

Software Developer

June 2025 – Present

Ahmedabad, Gujarat

- Building **Laravel + Inertia.js + React** applications with **Laravel Sanctum authentication** and **Redis-cached queue workers**, reducing average feature delivery time by **30%**.
- Integrated **CRM and messaging platform APIs**; optimized slow endpoints from **~700ms to ~420ms** using **query profiling, eager loading, and Redis caching**.
- Owning **end-to-end feature delivery** — from requirement analysis through production deployment — with **95%+ test coverage** via **PHPUnit** and **Pest**.
- Building **real-time notification systems** with **CI/CD pipelines** using **GitHub Actions** for automated deployment.

Yudiz Solutions Limited

Web Developer

Jan 2022 – May 2025

Ahmedabad, Gujarat

- Engineered **10+ Laravel applications** serving **50,000+ users** with **React/Vue frontends**; eliminated **N+1 query patterns** using **Eloquent eager loading** and **MySQL indexing**, achieving **sub-200ms** response times on core endpoints.
- Architected **cloud-native deployments** on **AWS (EC2, S3, RDS, Lambda)** with **auto-scaling**, **Laravel Horizon**, and **Supervisor-managed queue workers** — maintained **99.9% uptime** across all production systems.

- Built **payment processing systems** integrating **Stripe** and **Razorpay**, handling **\$500K+** in transactions with **zero downtime** using **idempotent Queue workers** and **webhook signature verification**.
- Led **code reviews**, enforced **SOLID principles**, and drove **TDD adoption** — lifted test coverage from **~60% to 95%** across production apps using **PHPUnit**, **Pest**, and **Cypress**.

Adore India

Software Engineer Intern

May 2021 – Aug 2021

Kolkata, West Bengal

- Delivered **4 production-ready features** using **Laravel REST APIs**, **Eloquent ORM**, and **Blade templating**.
- Participated in **API design reviews** and **database schema planning** for scalable web application development.

Projects

Letting a Property

June 2024 – Present

- **Technologies:** Laravel, PostgreSQL, Redis, AWS (EC2, S3), Stripe API, Open Banking API, Filament
- Built **advanced property search** with **geo-location queries**, availability filters, and **paginated listing APIs** supporting thousands of concurrent searches.
- Integrated **Stripe**, **Open Banking**, and **Direct Banking APIs** — processed secure payments using **webhook signature verification** and **idempotent Laravel Queue workers**.
- Implemented **multi-role system** (Landlords, Tenants, Admins) with **Laravel Sanctum RBAC**, in-app messaging, reviews, and **notification pipelines**.

Everflex Plus

Jan 2023 – Sep 2023

- **Technologies:** Laravel, React, Inertia.js, MySQL, AWS EC2, Redis, Laravel Sanctum, Horizon, Supervisor, Pest, Cypress
- Served **500+ therapists** and **3,000+ patients** with secure, **role-based API access** using **Laravel Sanctum**.
- Reduced API response times from **800ms to 440ms** by fixing **N+1 queries** with **eager loading**, adding **MySQL composite indexes**, and introducing **Redis query caching**.
- Implemented **event-driven background job processing** with **Laravel Horizon** and **Supervisor** — automated email workflows and real-time notifications increased user engagement by **30%**.
- Achieved **95% test coverage** with **Pest** (unit/feature) and **Cypress** (E2E), enabling confident production deploys.

Fidali

Oct 2022 – Mar 2023

- **Technologies:** Laravel, Vue.js, Inertia.js, MySQL, Stripe API, AWS S3, Docker, Redis, Laravel Queues
- Handled **500+ monthly reservations** and **\$50K+** in transactions via **Stripe** with full **webhook processing** and **zero-downtime Queue workers**.
- Containerized deployment with **Docker**; built **real-time Vue.js reactive UI** and **analytics dashboard** for property management.

Fleet Mart

Nov 2021 – Feb 2022

- **Technologies:** Laravel, jQuery, MySQL, Razorpay API, Bootstrap, JWT Authentication
- Developed **Laravel REST API backend** with **JWT authentication**, **multi-tier approval workflows**, and **Razorpay payment gateway integration** for **500+ users**, reducing fraud by **90%**.

Hackathons

- **Finalist**, Gujarat Industrial Hackathon 2019 at PDPU Gandhinagar
- Competed in **Smart City Rajkot Hackathon 2021**, developing innovative solutions

Education

Gujarat Technological University

Bachelor of COMPUTER ENGINEERING (CGPA: 8.65 / 10.00)

June 2018 - June 2022

Mehsana, Gujarat
